Simcom is simplicity

- Intuitive and comfortable user experience with wizards that guide you step by step
- Dashboard shows critical information at a glance
- Smart terminal with a large color display and alphanumeric keypad
- Powerful and flexible reporting tools as standard features

Simcom is real-time

- Simcom is securely hosted in the cloud, accessible from any browser, from anywhere, anytime
- Terminals perform real-time authorizations and automatic data synchronization
- Implement business decisions instantly around access, volume and pricing
- Fall-back modes ensure that fueling continues even through communication interruptions

Simcom is knowledge

- Data-driven operations benefit from real-time knowledge of inventory and activity at all dispensing locations
- Easily manage operator and vehicle accounts, with multiple identification credentials available
- Data is easily viewed and shared with users and systems across the organisation
- Capture important additional data with every dispensing transaction

Simcom is the future now

- Simcom is remotely configurable with updates delivered effortlessly
- Eliminate manual processes with automated tasks
- New features easily added as your operations grow and needs change
- State of the art security features protect your system and data integrity
