Simcom **simplicity**

- Intuitive and comfortable user experience with wizards that guide you step by step

- Dashboard shows critical information at a glance

- Smart multi-language terminal with a large color display and pressure activated alphanumeric keypad

- Powerful and flexible reporting tools as standard features

Simcom **real-time**

- Simcom is securely hosted in the cloud, accessible from any browser, from anywhere, anytime

- Terminals perform real-time authorizations and automatic data synchronization

- Implement business decisions instantly around access, volume and pricing

- Fall-back modes ensure that transaction continues and data is secured even through communication interruptions

Simcom **knowledge**

- Data-driven operations benefit from real-time knowledge of inventory and activity at all dispensing locations

- Easily manage operator and accounts, with multiple identification credentials available

- Data is easily viewed and shared with users and systems across the organisation

- Capture important additional data with every dispensing transaction

Simcom **future now**

- Customer Portal to view transactions and add credit

- Simcom is remotely configurable with updates delivered effortlessly

- Reduced overhead operating costs and with more management tools

- New features easily added as your operations grow and needs change

- State of the art security features protect your system and data integrity

"When we were looking to replace our bulk water stations transaction terminals, we were looking for a system that was easy to use for both our customer service reps. and customers. With Computrol's Simcom water management system dashboard, we are easily able to add new vendors, issue new credentials to existing vendors, and view/ export water transactions in near real-time from all 7 of our bulk water units."

**Erik Blake - GIS Manager,
Northwestern Water & Sewer District,
Bowling Green, Ohio**
